

1. Listen as your teacher reads each story problem.

Matt caught two fish before lunch and three fish after lunch. How many fish did he catch?

Write the combination.

$$\square + \square = \square$$

Bailey saw one blue jay and three robins.

How many birds did she see?

Write the combination. + =

2. Add.

$4 + 3 = \square$

$3 + 0 = \square$

$5 + 2 = \square$

$3 + 3 = \square$

$1 + 6 = \square$

$10 + 0 = \square$

3. Write the *before* and *after* numbers.

\square 20 \square

\square 52 \square

\square 40 \square
